

# Modular modernisation solution

KONE Monospace\*

thyssenkrupp

## Elevator improvements designed for your property

thyssenkrupp's new modular modernisation solution can adapt to all existing installations, regardless of the component type and its manufacturer.

We modernise the installation and extend its life, while protecting the environment and your budget.

Widely used and tested technologies, plus flexibility in parts supply are the perfect match for your modernisation project. Guaranteeing more reliable installations in terms of accessibility, quality and performance, including flexibility in choice of your maintenance provider.

Our expertise offers superior service ensuring that even small measures updating efficiency and reliability can lead to maximum success in improving installations.

## Daily advantages of the modernisation solution

- ✓ Adaptable maintenance through flexible components
- ✓ Quick installation time
- ✓ Independent from original manufacturer
- ✓ Easy to adapt to original manufacturer
- ✓ Tailor-made to suit your properties needs
- ✓ Improved safety using the highest industry standards

- ✓ Environmentally friendly
- ✓ Cost effective and high quality
- ✓ Optimised performance through intelligent upgrades

# Modernisation solution options

Our modernisation solutions come in four different packages customised to fit the status of the elevator, your budget and technical requirements. Solutions begin with the Primary Package to improve performance and accessibility.

The addition of door replacement with the Primary Plus Door package can dramatically improve safety, availability and efficiency for high traffic elevators.

In the case of machine replacement, the Primary Plus Machine package can guarantee a more energy efficient and sustainable future, offering clear improvement in functionality.

The Full Modernisation Package offers outstanding reliable service, incorporating widely tested state of the art technologies with a high standard of materials to offer the longest lifespan and optimum travel.

In addition to the standard parts, you can choose special options such as technical solutions or design options to match your building's style and characteristic features.

## Package specifics

1

### Primary Package

Travel more safely with improved accessibility and performance. Increased comfort from a smoother ride through optimised technology modernisation.

- ✓ Controller
